Old Settlers' Day Celebration

Committees Appointed and Arrangements Under Way

Arrangements are well under way for the Old Settlers' Day celebration to be held on Washington's Birthday, February 22. A large number of representative people met at the bank last Tuesday afternoon at four o'clock. These celebrations are much enjoyed by the people of Campbell and friends from all over the county who meet here each year.

The committee on arrangements, of which John F. Duncan is the chairman, appointed the following sub-committees: Chairman of the day, S. R. Wade.

Finance, C. B. Miracle, B. O. Curry, E. R. Kennedy.

Speakers, J. F. Wilson, J. C. Ainsley, J. F. Smith.

Program, I. W. Snow, Mrs. Shaw, C. H. Whitman, Mrs. Rucker, J. E. Palmer.

Hall, W. S. Shelly, F. J. Shaw, P. B. Payne.

Refreshments, Country Woman's Club.

Decorations, Woman's Christian Temperance Union.

Press, L. C. Dick, B. O. Curry.

Reception, Dr. C. N. Cooper, chairman, local G. A. R. members.

Law and order, T. L. Sharp, C. Gard.

Ushers, Roy Archibald, chairman, 6 High school boys.

Notice the corrected time table of the Peninsular Railway Company in this week's issue.

Pandita Circle Meeting

A Recipe for Cooking Husbands, so as to make them tender and good

The Pandita Circle met Tuesday of last week at the home of Mrs. Savage.

The Circle this year is studying California, which is proving a most interesting subject, especially the study of the old missions.

Roll call was answered with quotations from California authors. Evidently one lady found it difficult to find a quotation, so she solved the problem by reading a most interesting recipe, "How to Cook a Husband." The ladies all resolved to adhere strictly to the rules in the future.

The following program was given:

Description of the Bural Place of Father Junipero Serra, Miss Charlotte Palmer.

Sketch of the Santa Clara and San Jose Missions, Mrs. Nelson.

Origin and Confiscation of the Pious Funds, Mrs. Olds.

Piano duet, "La Chasse Aux Gaxelles," Mrs. Beal and Miss Woodward.

A good many husbands, this lady remarks, are utterly spoiled by mismanagement. Some women go about it, as if their husbands were bladders, and blow them up. Others keep them constantly in hot water. Others let them freeze, by their carelessness and indifference. Some keep them in a stew all the time, by their irritating ways and words. Others roast them. Some keep them in pickle all their lives.

It cannot be supposed that any husband will be tender and good managed this way, but they are really delicious when properly treated.

In selecting your husband, you should not be guided by the silvery appearance, as in buying mackerel, nor by the golden tint, as if you wanted salmon. Be sure to select him yourself, as tastes differ. Do not go to market for him, as the best are always brought to your door.

It is far better to have none, unless you will patiently learn how to cook him. A preserving kettle of the finest porcelain is best, but if you have nothing but an earthenware pipkin, it will do, with care. See that the linen in which you wrap him is nicely washed and mended, with the required number of buttons and strings tightly sewed on. Tie him in the kettle by a strong silk cord called Comfort, as the one called Duty is apt to be weak.

They are apt to fly out of the kettle and be burned and crusty on the edges, since, like crabs and lobsters, you have to cook them while alive. Make a clear steady fire out of Love, Neatness and Cheerfulness. Set him as near this as seems to agree with him. If he sputters and fizzes, do not be anxious; some husbands do this till they are quite done. Add a little sugar, in the form of what the confectioners call kisses. Use no vinegar or pepper on any account. A little spice improves them, but it must be used with judgment. Do not stick any sharp instrument into him, to see if he is becoming tender. Stir him gently, watching the while, lest he lie too flat and close to the kettle and so become useless. You cannot fail to know when he is done. If thus treated, you will find him very digestible, agreeing nicely with you and the children, and he will keep as long as you want, unless you become careless and set him in too cold a place.

Local and Personal

Lost—A pocket book containing Oriole bills. Address Ira Brown, Campbell, Cal.

Mr. O'Neal and family have moved into their new home near the water tanks, just off from First street.

The San Jose High school will hold the mid-winter commencement exercises next Thursday evening, Feb. 2.

Miss Mary Eckles, of Saratoga, spent weekend with Mrs. S. L. Hayes. While here she visited many of her old school friends.

George Marshman, who has been a cowboy in Nevada for the last six years or so, came home Saturday. He will be at home indefinitely.

Read the ad of the Bank of Campbell in this issue regarding their new safe deposit boxes. This new arrangement will be a great convenience to many.

If you are interested in Black Minorca chickens, S. G. Rodeck has a heavy-weight and heavy-laying strain of stock from which he is now selling eggs.

Mr. E. Kay, who lives on Fruitvale avenue, suffered quite severely for a few days as the result of getting acid into his eyes, while spraying fruit trees last week.

Mrs. James Kelly has had installed for cooking purposes, one of C. H. Whitman's distillate burners. They are a great convenience in the kitchen and are cheaper than burning wood.

The services in the Congregational church next Sunday will be the same as usual. Preaching in the morning and evening and Sunday school and Christian Endeavor at the regular hours.

Don Marshman was in Chico the latter part of last week. Being president of the student body of San Jose Normal, he went to Chico as a representative of the school with the basketball and debating teams.

The White Leghorn is the "business hen" of America. She is a heavy layer, a small eater, and lays an egg which always brings first price on the market. E. E. Cleveland, of Saratoga, has a heavy-laying, large, single comb variety from which he is selling day-old chicks. See his ad in this paper.

High School Notes

Two men are engaged in wiring the building this week for electric lights.

The girls of the Philosophia Society held a masquerade party at the home of Miss Muriel Palmer, last Friday evening. Miss Catton was the guest of honor.

At a recent meeting of the Board of Directors of the I. A. U., March 18th, was fixed as the date for the annual track meet. Baseball and girls' basketball schedules were arranged. Complete A. A. L. schedules for baseball and basketball have also been arranged. The date of the A. A. L. track meet has been fixed as April 1st.

Good Templars Lodge for Campbell

State Organizer, Mr. Florey, is working in our midst, and has secured a number of names, who with others will come together Tuesday evening, January 31, in I. O. O. F. Hall, at 7:30 p. m. At that time the Lodge will be instituted.

There will be a short program rendered previous to the initiation. Any one desiring to join the order, will be able to do so, though they do not arrive until about 8:30 p. m. It is hoped there will be a large turn out at this meeting, which will be free to all, except the persons joining.

A Mammoth Egg

The Press Office has on exhibition a mammoth egg weighing a trifle less than four ounces and measuring the large way 8 inches in circumference and the smaller way 6 1/2 inches. The egg was laid by a Black Minorca hen owned by John Spencer, of Sunnyside. A standard egg weighs twenty-six ounces to the dozen. A dozen of this kind would weigh forty-seven ounces.

Another Big Egg

Since our last week's issue in which we made mention of the mammoth egg brought in by John Spencer, many of the hens of the neighborhood have been making an extra effort. Mr. Rodeck brought in a Black Minorca hen egg this week which weighs just a trifle less than the other. It will take second place.

Surveyed the Mexican Line

The Press Office had a call Tuesday from General G. B. Tolman, an old friend from San Jose. The General has had a large experience in government service; besides holding various offices in the army he surveyed the line between California and Mexico. Mr. Tolman has also had considerable newspaper experience, having been editorial writer for the San Diego Union, the Jacksonville, Oregon, Democrat, and the Peoples' Party Journal, of San Francisco.

Heard on the Street

That—The Interurban Press Office ought to be on wheels.

That—Mrs. Hoag is becoming very popular as a caterer these days.

That—Frank Thomas felt slighted because the boys didn't charivari him.

That—J. H. Neff is making a decidedly improved appearance about his corner.

That—Dr. Blanchard has a mighty nice and neat suite of rooms in his new quarters.

That—It was too bad to lose those two nice umbrella trees in front of the tennis court on Campbell avenue.

That—The presence of genial Judge Farley has been very much missed on our streets for the last few weeks.

That—B. O. Curry has the thanks of the entire community for removing that dilapidated old shed back of his office.

That—Our friend E. F. Woodhull can live on "Easy Street" the rest of his life, now that he has an income of \$2000 per year.

That—R. K. Thomas is doing a very fine job on his stone wall, and when he gets through with the improvements he will have the prettiest and most up-to-date home in Campbell.

Reduction Sale

On Misses School Shoes. \$2.25 Box Calf Lace Shoe, now \$1.75. Just the shoe for this wet weather. Sizes 2 1/2 to 6. These are good values.

E. E. SOWER, Sutter Block

Old English Miracle Plays at Stanford

The English Club of Stanford university announces the presentation of three Old English Miracle plays, "The Salutation," "The Second Shepherd's Play," "The Play of the Three Kings" on February 3 and 4. The plays will be presented in the same manner in which they were staged originally with the exception that the stage will be used instead of the wagon on which the early players performed. Costumes and setting will be historically correct and as the plays have been translated from the Old English for the occasion, a performance of unusual interest is assured. The plot of the Shepherd's play is a rollicking comedy and one of the best examples of the early farce.

A special performance has been arranged for Saturday afternoon, February 4, at 2:15, for the convenience of residents of nearby towns, which will be identical with the regular performance to be given on Friday evening, February 3. Tickets may be obtained from Miss Ruth Sampson, Stanford university, and will be one dollar, seventy-five and fifty cents.

Aviation Meet at San Jose Saturday and Sunday

The Aviation Meet under the auspices of the Santa Clara Valley Aero Club, at the San Jose driving park Saturday and Sunday, is attracting much attention. The program from two to five on Saturday afternoon will have exhibitions of speed, altitude, quick starting and accuracy of alighting, by James Radley, holder of the world's speed and quick-starting records, and by the famous California aviator, Fred J. Wiseman.

Motor cycle races for Radley's (personal) cup, value \$100.

Harness races under auspices of San Jose Driving Club.

Music throughout the afternoon. A principle feature will be the arrival of James Radley from Selfridge Field. He will leave San Francisco at one-thirty and make a straightaway course to San Jose. There he will be assisted by Fred Wiseman.

Campbell Book Club List

Campbell Book Club have the following books listed for this year's course of reading.

The Rosary.....	Florence L. Barclay
The World I Live In.....	Helen Keller
By Inheritance.....	Octave Thanet
Romantic California.....	Ernest Peixotto
Sonny's Father.....	Ruth McEnery Stuart
Hamstead Quarries.....	Mary E. Waller
My Mark Twain.....	W. D. Howells
Rest Harrow.....	Maurice Hewlett
The Healthful Art of Dancing.....	L. H. Gulick
The Creators.....	May Sinclair
As a Chinaman Saw Us.....	Anon.
The Mistress of Shenstone.....	Barclay
Persia and Its People.....	Ella C. Sykes
The Freebooters.....	Agnes Laut
The Spirit of America.....	Henry Van Dyke
The Crimson Conquest.....	C. B. Hudson
African Game Trails.....	Theodore Roosevelt
Hidden Water.....	Dane Coolidge
How To Know Architecture.....	Frank E. Wallis

The A. Van der Naillen School

of Practical Civil, Electrical, Mining Engineering
Established 1884
Occupying their own building, workshop and laboratories. Open all year. Great demand for ex-students in all lines. New students should enroll at once. Address 51st St. and Telegraph Ave., Oakland, Cal.

IF YOU WERE BUYING EYES

What would you get? The best of course. Follow the same plan in buying glasses.

Have them fitted properly, then buy a frame or mounting such as you can afford.

Fitting glasses for children is my specialty. No drugs. No danger.

Satisfaction guaranteed.

BERT K. KERR, Optometrist

31 E. Santa Clara St. San Jose.
Formerly the PRATT-KERR OPTICAL CO.

One of the important things installed in our new bank building for the use and convenience of our patrons will be a system of modern safe deposit boxes.

Easy of access, strictly private, protected by a strong reinforced burglar proof, fire proof vault, lined by the most modern electrical protection system to be had.

It is our desire to have our patrons to avail themselves of this opportunity of procuring a strong box accessible and convenient at all times.

The rental will be reasonable and within the reach of all. Call and let us place your name on our list.

COAST HAPS AND MISHAPS OF THE WEEK

Recent Occurrences Along the
Pacific Slope Related
in Brief Items.

Paragraphs Selected With a View
to Giving Busy Readers the
News in a Nutshell.

Petaluma.—Mrs. Candis Bell, wife of J. W. Bell of Healdsburg, dropped dead of apoplexy while cooking.

Madera.—The explosion of a gasoline tank on a seeder, caused by playfully igniting matches, horribly burned two youths, Otis Russell and Harold Miner, and resulted in their deaths.

Salinas.—Miles E. Wilson, an employee of the Spreckels sugar refinery near this city, received injuries that will prove fatal when he fell from a trestle 50 feet to the ground.

San Jose.—Oscar Headstrom, aged 26, a member of one of the most prominent families in this city, committed suicide by hanging himself in a clothes closet of his residence. Sickening is given as the cause for the act.

Richmond.—Under the recent decision in the San Pedro and Wilmington cases that the State is the sole owner of tide lands, the Richmond inner harbor project has received new impetus, and added efforts will be made to carry it out.

Seattle.—The body of a well groomed unidentified man, who, apparently, had committed suicide by drinking carbolic acid, was found on a pile of lumber at the foot of University street. The only clew is the name of a Fairbanks, Alaska, clothing house on the coat.

Oroville.—The presence here of C. B. Jones, said to be one of the company that recently paid \$17,000,000 for the patent of a new concrete tie invented by a San Jose man, has led to the report that the company will open a big cement deposit in the hills above this city.

Long Beach.—The coroner's inquest into the death of John Owens, who was allegedly taken for a burglar and shot to death on his own doorstep by Richard Ward, a friend of the family, resulted in a verdict that death was caused by a gunshot wound inflicted with intent to kill.

Richmond.—Another big piece of street work that is made necessary by the expansion of Richmond will be started as soon as the weather clears. This is the grading and macadamizing for a distance of 25 blocks more of McDonald avenue, the main business street of the city.

Colusa.—Rapidly exchanging shots, following an argument over the right to use a net in the Yerxa cutoff near Princeton, John Trietz, lessee of land near the cutoff, was shot in the head and badly wounded, and Ben Hammond was hit in the head, but escaped serious injury, in a shotgun duel.

Long Beach.—The unknown woman who was found unconscious on the beach here with a bullet hole in her temple, has been identified as Miss Sarah Cadin of Trenton, Ill. It is believed to be a case of suicide, as the woman had been despondent over the death of her mother six months ago and her own ill health.

Fresno.—George C. Goucher, formerly State Senator and ex-District Attorney of Madera county, passed away at Madera after a long illness. Senator Goucher was one of the best known criminal lawyers in this section of the State, and while a member of the Legislature was mentioned frequently as a likely candidate for Governor on the Democratic ticket.

Seattle.—The following message, being sent from Marshfield, Or., to Roseburg, Or., was picked up by the wireless station here. "Have just been informed that the city of Gardiner, Or., is totally destroyed by fire. No doubt many people are in distress. Almost impossible for us to reach them immediately. Think best way to send assistance is by way of Scottsburg."

Oakland.—The two farewell notes which Marie Engel left on board the ferryboat just before she jumped to her death last month were admitted by Judge Brown as the will of the deceased. The letters are in German, and one is written to Mrs. Bulski and the other to Attorney Gutsch. The envelopes are to form a part of the will. The estate, which is valued at about \$3000, is left to two brothers in Germany.

CARNEGIE GIVES FORTUNE TO RIGHT WORLD'S ERRORS

An Institution to Perfect Records of
Land, Water and the Heavens.

New York.—The donation of an additional endowment of \$10,000,000 to the Carnegie institution of Washington by Andrew Carnegie has been announced. This brings Carnegie's gifts to the institution up to \$25,000,000.

Coupled with the formal announcement was a declaration by Carnegie that the work of the institution had cleared from blame the captain of a British ship who ran his vessel on the rocks, by proving that the British admiralty charts by which the captain was guided were two to three degrees astray.

The discovery of 60,000 new worlds by Professor Hale at the observatory on Mount Wilson, California, also was announced.

Carnegie also announced that a far more powerful telescope than man has ever made is now under construction for the Mount Wilson observatory.

Carnegie declares: "The whole world is going to listen to the oracle on the top of Mount Wilson and in a few years we shall know more about the universe than Galileo and Copernicus ever dreamed of."

Doubtless you noticed in the telegraphic news that the yacht Carnegie had just reached Buenos Ayres. That yacht is the first one ever built with bronze substituted for iron; the latter deflects the magnetic needle and bronze does not. The result is that all former observations are inaccurate.

"The Carnegie is going over all the seas year after year, putting the world right. That one service will give ample dividend on the whole \$25,000,000 in my opinion."

"But this is not all the institution is doing. It is experimenting in its geophysical laboratory on the rocks and analyzing them and will soon be ready to show a formula for the making of Portland cement or concrete."

Carnegie's latest donation is in bonds. The institution was founded on January 28, 1902, when Carnegie gave to a board of trustees \$10,000,000.

Carnegie had written a note to Robert S. Woodward of Washington, president of the institution, telling him of the donation, and this note was on Carnegie's desk when Woodward called on the steel magnate.

"Mr. Woodward," said the iron master, as the president entered, "I am very busy. I need some time to devote to my affairs here, and I dislike to be interrupted. Would you mind waiting in the next room for awhile? And, by the way, here is something that may interest you."

Carnegie nonchalantly handed him the note. While Woodward read of the endowment, Carnegie sat at his desk and chuckled fully five minutes.

Smugglers Cache of Opium Discovered.

San Francisco.—More than \$17,000 worth of opium, which was hidden aboard the Pacific Mail liner Korea, was seized last week by the customs inspectors, who discovered the smugglers' caches in two hitherto untold hiding places aboard the vessel which they were searching. Customs officials assert that this is the biggest seizure of opium ever made in this port, and they are of the opinion that it is the biggest single seizure of opium ever made in America.

Masked Bandit at Capitol.

Washington.—A masked bandit with a revolver in each hand entered the billiard room of the Varnum Hotel, at 10 o'clock one evening last week, and ordered the eight persons present to hold up their hands and allow him to make the search of them for money and valuables. All hands went up, but the bandit managed to get only through one victim, from whom he got \$6, before he was interrupted. The police are still looking for him.

Officers Fight With Smugglers.

Santa Barbara.—One Chinese was captured and several smugglers are believed to have been wounded in a revolver fight a few miles down the coast from Santa Barbara, when immigration officers from Los Angeles encountered what is believed to have been a landing party from the smuggling schooner which the revenue cutters Bear and Orient have been trying to locate.

Miner Burned in Cabin.

Sonora.—Charles C. Kane, a mining man, was burned to death in his cabin four miles north of this city. The fire is supposed to have been caused by the explosion of a coal oil lamp. Kane, who was 65 years of age, leaves relatives in Alameda, where he will be buried.

A "Good" Counterfeit Bill.

Washington.—The best counterfeit bill since the famous "Monroe Hundred" silver certificate, turned out by the Taylor Jacobs gang in 1899, has been found circulating in Kansas by the secret service.

Some of the New Laws Under Discussion at Capitol

Sacramento.—The custom of giving away automobiles, town lots or other articles of merchandise on tickets given away with purchases will be done away with if a bill introduced in the House by Clark of Alameda becomes a law.

Assemblyman Milton Schmitt's bill, increasing the number of Superior Judges in San Francisco from 12 to 16 passed the lower House.

All kitchens in hotels as well as restaurants and bakeshops will be subjected to careful inspection if the Assembly Committee on Public Health and Quarantine has its way.

Any person conducting a business under a fictitious or trade name is compelled to file his own name with the proper authorities by the provision of a bill introduced by Senator E. I. Wolfe.

Senator J. B. Sanford anticipated an administration measure when he introduced a bill providing for the reestablishment of the system of district fairs, which existed ten years ago.

Night hunting or night fishing for any game fish is prohibited under the provisions of a bill by J. E. Mullally in the Assembly. The bill also eliminates the early morning fishing and hunting.

Prior to the taking of any action on Senator Strobbridge's bill providing for the buying and selling of poultry and eggs by pound weight avoirdupois, it is probable that the poultry men may ask to be heard.

Oakland wants to acquire the State's interest in the submerged and tide lands of Lake Merritt. A bill was offered in the Assembly by George Fitz-

gerald for the State to cede to Oakland all title it may have to tide lands in Oakland west of Pine street.

Improvement in the sanitation of dairies and strict observance of laws of standard weights and measures in the sale of dairy products is provided for in a bill backed by the State dairy bureau.

Joint control by parents over children as provided for in a bill by Senator H. R. Roseberry received the official disfavor of the judiciary committee. The principal idea for the bill was that it provided for the care of the children in the case of one of the parents being dissolute or in case of separation.

Congress is asked to purchase the Calaveras grove of big trees in a joint Senate resolution introduced by Senator A. Caminetti. Congress has provided for exchange of timber lands. It is the purpose of Caminetti's resolution to prevent the commercializing of the big trees by private interests.

Assemblyman Struckenbruck's bill providing for the procuring and distribution of blood serum or vaccine for the prevention of hog cholera in the State of California, was a special order of business before the Committee on Live Stock, of which J. W. Hamilton is chairman. In 33 States a law providing for hog vaccination as a preventive of cholera is in force.

In the Senate, Senator Campbell offered two bills regulating the use of automobiles. They provide a maximum penalty of \$500 fine or six months imprisonment, or both, for any person found driving an automobile when intoxicated, and a penalty of five years' imprisonment or \$500 fine, or both, for autoists who seriously injure other persons by running them down.

Ely and Aeroplane Make Good in Military Tactics

San Francisco.—Eugene Ely of San Francisco made himself the hero of the aviation meet just closed in this city. Not only this, he has brought to himself and his name fame and a place in the world's history.

It was the same Eugene Ely who flew from the deck of a war vessel to land. This occurred several months ago in Hampton Roads, Virginia, when he flew from the Birmingham. His flight of last Wednesday completed the second phase of the problem, flying to the deck of an anchored battleship of the Pacific fleet. He then rose from the vessel and flew back to the aviation grounds.

At exactly 10:45 a. m. the start was made from the field. Fourteen minutes later a wireless message from the Pennsylvania announced that the landing had been made "as lightly and gracefully as a bird."

A wireless message was sent to the ship asking when the return journey was to begin. Captain Pond replied:

"Ely will leave in about five minutes. Landing was perfect. Stopped within 25 feet. Wind was on starboard quarter at about 15 knots per hour. Conditions difficult."

In just seven minutes after the receipt of this message Ely was sighted over the San Bruno Hills. He made the return journey in about 12 minutes, and in landing accurately struck the judges' starting line with his front wheels.

An observing person in the grandstand might have been noting during the entire meet that every landing made by Mr. Ely had been on this exact spot, excepting one made in a heavy wind which blew him ten feet beyond the mark.

It now merely remains to try the landings and starts from the deck of a moving vessel at sea. This last stage of the problem is much easier than were the two steps already taken. In fact, the landing made was as difficult a feat as it could have been made.

Parmalee Sets New Record for Endurance Flight

San Francisco.—Three hours and forty minutes in the air is the new national endurance record in flight of heavier than air machines, made by Phillip Parmalee, member of the Wright team, at the aviation meet here last Sunday.

One hundred thousand persons, if the megaphone man at the field knew whereof he spoke, watched Parmalee accomplish the longest aeroplane flight ever made in America. When, benumbed with cold, and with but a few drops of gasoline left in his tank, Par-

malee sailed gracefully to earth as possessor of the new American record for duration.

For three hours and forty minutes Parmalee had circled steadily over the aviation field, never turning from the course marked by the pylons and never varying more than a few yards from an altitude which was estimated at something over 500 feet. Half an hour before his descent Parmalee had broker the official American endurance record, and six minutes later had surpassed the unofficial endurance feat of his old teammate, Arch Hoxsey.

Fraudulent Mining Stock.

Washington.—The Supreme Court of the United States denied a request that it review the conviction of Frank Horn, Elisha H. Horn, Raymond P. May and S. H. Snider of Kansas City, Mo., on the charge of using the mails to sell alleged fraudulent mining stocks. The men were sentenced to imprisonment for a year and a day and to pay a fine of \$500 each.

Athlete Killed by Explosion.

San Jose.—Frank E. Clikier, a Stanford man, who was considered the best all round athlete in this county when a student at the Santa Clara high school, died at the Roosevelt hospital in Berkeley as a result of injuries received in an explosion of distillate.

Japs Import Ball Team.

Victoria, B. C.—A Japanese baseball team is to invade the United States, landing at San Francisco in April. Games will be played in Chicago, Boston, St. Louis and other cities. The Japanese will return home in September or October. The team will be composed of picked players from the Waseda and Kelo University and other clubs.

Cadets Aid Fire Department.

San Rafael.—The cadets of the Hitchcock military academy aided the city fire department in saving the institution from fire. The blaze was confined to the destruction of a \$500 pumping plant close to the main building.

RBEELS REPULSED IN MEXICAN REVOLUTION

Yaqui Indians Join Insurrectos—Federal Reinforcements to the Front.

Parral Chihuahua, Mexico.—Following the fight Sunday at Baquirichie, this State, in which seven rebels were killed and ten wounded, the rebels attacked the town and another fight took place, the rebels losing 14 dead and two wounded. The Federals had two wounded.

Reports that the Tahuamari Indians had joined the rebels were confirmed, as many of them were in both of these fights, the seven killed Sunday being Yaqui Indians. Several years ago these Indians rose in rebellion against taxes, but General Luis Terrazas, father of the present Governor, and then Governor himself, pacified them by granting concessions.

Mayor Valles of this city has been authorized to double the strength of his rurales and has added 35 men to the force.

Sixty cavalrymen were sent from here to Baquirichie to reinforce the small command at that place which fought off the rebels Sunday and Tuesday.

New National Guard Troop.

Alturas.—Probably the most active troop of cavalry in the National Guard of California will be that soon to be organized in Alturas. This will be composed for the most part of broncho busters, many of whom participated in the contests at the fiesta of the Dawn of Gold in Sacramento during the State Fair. When the Alturas troop is organized it will make four organizations of the kind in California, and will complete a squadron. There are now troops at Sacramento, Salinas and Los Angeles. Dr. E. F. Auble, who is at the bottom of the movement for a troop in Alturas, has been in conference with Adjutant-General E. A. Forbes in Sacramento several days. Dr. Auble reports that General Forbes gives the movement his enthusiastic support and likes the interest that is being taken in the guard in this city.

Stabbed in Back With Pick.

Alturas.—Stabbed in the back with a pick in the hands of a Greek laborer, known as Henry, Deputy Sheriff Thomas Frawley lies near death following an operation. Physicians express little hope for his recovery. Public feeling against his assailant is said to run high. After a search of an entire night the Greek was located by a posse in a small cabin of a countryman. The Greek had accused an Indian squaw of stealing a ring from him. While she was in town he stole her horse. Frawley then took the horse away from the enraged Greek.

Johnson and Langford to Fight.

Philadelphia.—Jack Johnson will meet Sam Langford before the American Athletic Club at Philadelphia within the next six weeks. Jack O'Brien, who runs the club, got the men to agree to a six round bout. While the figures have not been given out it is understood that the men will fight for a \$10,000 purse, and that each will be required to deposit \$2500 within the next week.

Socialists in Japan.

Tokio.—The sentence of 12 of the 24 alleged anarchists, who were condemned to death by the Supreme Court, were commuted to life imprisonment. The clemency was not extended to Denjiro Kotoku, the alleged ring-leader, who lived in San Francisco prior to 1906, and his wife, both of whom will be executed.

Yuba and Sutter Lands.

Marysville.—Since the beginning of the year there has been a noticeable increased activity in the sale of farm lands in Yuba and Sutter counties. Local real estate dealers are kept busy locating newcomers on small farms.

Wedding in High Life.

San Antonio, Texas.—While sailing aloft over San Antonio in a dirigible balloon at a height of 800 feet Miss Marie Shelton and W. Walter Stowe, well known young people of San Antonio, were married.

New Treaty With Canada.

London.—The London Times prints a Washington dispatch saying that the United States and Canada have fully agreed upon a reciprocity treaty. The terms of the agreement are not given in the dispatch.

Car Accident Proves Fatal.

Oakland.—Mrs. Elizabeth Wallace, wife of James Wallace, a retired merchant of San Francisco, died at Fabiola Hospital from a fracture of the hip sustained in a fall from a streetcar several weeks ago.

When the Hair Falls

Stop it! And why not? Falling hair is a disease, a regular disease; and Ayer's Hair Vigor, as made from our new improved formula, quickly and completely destroys that disease. The hair stops falling out, grows more rapidly, and all dandruff disappears.

Does not change the color of the hair.

The little book in each package gives the formula of our new Hair Vigor, tells why each ingredient is used, and explains many other interesting things. After reading you will know why this new hair preparation does its work so well.

S. F. N. U. No. 4, 1911

READERS of this paper desiring to buy anything advertised in its columns should insist upon having what they ask for, refusing all substitutes or imitations.

THE EDIBLE BIRD'S NEST

Demand Exceeds Supply and Commodity Sells as High as \$25 a Pound.

Edible bird's nests are found in the islands off the coast of Siam and are the products of a species of birds belonging to the family of swifts. The nests consist almost entirely of the salivary secretion of these birds, whose salivary glands are much more developed than those of the ordinary swift. The season for the gathering of the nests begins in April and ends in September.

The female bird, occasionally assisted by the male, makes the nest. About three months are spent by the birds in completing their first nest, which is taken by the nest gatherer before eggs are laid in it; then the birds immediately begin to make another nest, which is finished in about 30 days, and which is also taken. Finally, a third nest is made in about three months, in which the bird is allowed to rear its offspring, after which this nest is also gathered. Each family of birds thus furnishes three nests in one season. The nests taken at the beginning of the season are considered the best in quality.

Most of these edible nests are consumed by the Chinese, who regard them, not only as a great table delicacy, but also as a valuable tonic medicine in neurasthenia and pulmonary disorders. It is said that the demand in Hongkong for the nests exceeds the supply and that prices range from \$15 to \$25 per pound, according to quality.

The Table Groaned.

"There are several names for it," explained the talkative boarder; "it may be called the deboned conundrum or the amputated conundrum or the half point conundrum. It's a conundrum that has had its enacting clause stricken out. Here's a sample: The one is a Barkle that's willin', and the other is a Willis that's barkin'."

"But what is the question that goes with it?" asked the argumentative boarder.

"There isn't any question that goes with it. It has been deprived of its interrogation point. That is why it may be called a half point conundrum."

Nobody said anything in rejoinder. But the table groaned.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Firmness Not Stubbornness.

There is a vast difference between stubbornness and decision, between firmness and what is termed "pig-headedness." The decided man has thought out his course and sticks to it for good reasons. The stubborn man insists on having his way merely because it is his way.

To Cure A Cold in One Day

Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

Common Names.

The commonness of the name John is due to the fact that 49 days in the year are associated in the Roman calendar with some saint, martyr, confessor or beatus named John, and formerly one took his name from the saint on or near whose day he was born. In Domesday Book William is the commonest name, then Robert, then Walter. Magdalen used at one time to be a fairly popular name.

Appeal Made Effective.

A certain Harford (Md.) farmer has hit upon a mode of relief from trespassing fowls belonging to his neighbors. On one end of a thread four inches long he fastened a grain of corn and on the other end a tag inscribed "Please keep me home." These were scattered where the trespassers were usually found, and a score or more of hens carried home the appeal.

Here's a Comment.

The loud-mouthed bully who blatantly tells a quiet, peaceable man what he's going to do to him, doesn't prove that the quiet man is afraid of him by a long shot. He only proves that he is a loud-mouthed bully, and when it comes to a showdown he's apt to be something of a coward.

It's Different in Life.

"In novels the virtuous hero always waits twenty years for the equally virtuous heroine; in real life neither waits for the other more than 20 minutes, and sometimes not even that, if there is anything more exciting going on."—"Diana of Dreams," by G. B. Burgin.

VITALIZER

RESTORES LOST POWERS. A weak man is like a clock run down. MUNYON'S VITALIZER will wind him up and make him go. Begin on MUNYON'S VITALIZER at once, and you will begin to feel the vitalizing effect of this remedy after the first dose. Price \$1.00, post-paid. Munyon, 53d and Jefferson, Phila., Pa.

SAVED FROM AN OPERATION

By Lydia E. Pinkham's Vegetable Compound

Peoria, Ill.—"I wish to let every one know what Lydia E. Pinkham's remedies have done for me. For two years I suffered. The doctors said I had tumors, and the only remedy was the surgeon's knife. My mother bought me Lydia E. Pinkham's Vegetable Compound, and today I am a healthy woman. For months I suffered from inflammation, and your Sanative Wash relieved me. Your Liver Pills have no equal as a cathartic. Any one wishing proof of what your medicines have done for me can get it from any druggist or by writing to me. You can use my testimonial in any way you wish, and I will be glad to answer letters."—Mrs. CHRISTINA REED, 105 Mount St., Peoria, Ill.

Another Operation Avoided.
New Orleans, La.—"For years I suffered from severe female troubles. Finally I was confined to my bed and the doctor said an operation was necessary. I gave Lydia E. Pinkham's Vegetable Compound a trial first, and was saved from an operation."—Mrs. LILY PEYRON, 1111 Kerlereau St., New Orleans, La.

The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing feminine ills from which so many women suffer.

For good results use Dr. Kilmer's Swamp-Root, the great kidney remedy. At druggists. Sample bottle by mail free, also pamphlet. Address, Dr. Kilmer & Co., Binghamton, N. Y.

AUTO GOSSIP.

An interesting feature of the commercial truck contests recently held in New York, Boston and Chicago was the proven efficiency of the various designed commercial tires. Of the several makes used Diamond's came most prominently into notice. This make of tire won first place in two divisions in each of the three contests. Not one of the six winning trucks which wore Diamond equipment experienced a particle of trouble.

Among the American cars which have been used extensively this past season in European touring is the Lozier. According to advices received by Pioneer Automobile Company some twenty Lozier owners advised the Lozier factory of their intended tours of Europe. To meet any possible needs of these tourists supplies of extra parts were shipped to central points in the world, and in every instance these supplies were returned, the boxes in which they were sent, being unopened. Not a Lozier out of all that were used this year in Europe found it necessary to call for an extra part.

Every automobile driver will admit that the efficiency of its accessories plays a large part in any automobile's running ability and that much importance must attach to equipment where a record of any decided merit is made. It is because of this fact that the local branch of the Weinstock, Nichols Company take special pride in the fact that the Cadillac was equipped with a Schebler carburetor on the record Los Angeles Run.

Since taking delivery a few weeks ago of two Cartecar delivery trucks of 1000 pounds capacity each, the local branch of Hale Bros. has been using the vehicles in particularly strenuous service. These two machines were bought after the purchasers had devoted over a year taking demonstrations from the various commercial vehicles on the local automobile market and a thorough test had been made of the efficiency of all in the delivery service.

The Cartecars were delivered just in time to meet the requirements of the holiday trade. In consequence their loads have been heavier than they would have been under normal conditions and their runs per day unusually long. Never the less they have stood up perfectly under the strain.

Laughter and success go hand in hand, as do grouches and failures.

A Minneapolis mill turns out 17,000 to 18,000 barrels of flour a day.

TRIALS OF THE BANK CLERK

Through Them All He Sticks to Post, Preserves Self Respect and Respect of Others.

One occasionally hears of a defalcation on the part of a clerk in a bank, trust company or other financial institution; but, considering the number of men so employed, the proportion that fail of absolute honesty is small indeed. The young man who is always neat, always courteous, always at his desk to enter your credits or point out your errors seldom forgets that he is dealing with the property of other people; yet as bad influences, as bad environment, as bad examples as are brought to bear upon him from any source frequently emanate right in banking circles, possibly within the very institution which he serves faithfully for a very small salary.

Unfairness in administration is perhaps before him every day; handling of securities and money by the heads of institutions in ways that would be thought improper (not to say dishonest) if employed by the bookkeeper or check clerk is often done with his knowledge and with the knowledge of his fellow clerks; yet he sticks to his post and seldom fails to preserve his self respect and deserve the respect of others.—I. F. Ferris in Leslie's.

THOROUGHbred ANIMALS AND PLANTS.

"There is as much difference between thoroughbred and ordinary plants as between thoroughbred and ordinary animals." This statement is made by D. M. Ferry & Co., of Detroit, the greatest flower and vegetable breeders in the country, and appears in their 1911 Annual Catalogue just issued. They argue for the great value and economy of thoroughbred seeds. "Any fundamental natural law which applies to animals applies equally to plants." A good cow (i. e. a thoroughbred) eats no more than a poor one, but may give twice as much butter-fat. "Good blood" makes as much difference with corn as with cows. But thoroughbred plants, like thoroughbred animals, are not produced in one or two generations, for no matter how superior an individual of common origin may be, its progeny are as a rule like the general run of its antecedents. Hence the need for seedsmen like D. M. Ferry & Co. They have experience, the best plant breeding equipment in the United States, and the business acumen to sell only such seeds as have been bred from the choicest stocks for many generations.

D. M. Ferry & Co's Seed Annual for 1911 may be had free of charge by writing to them at Detroit, Michigan. It contains much of interest for those who think.

BOYS AND GIRLS GIVEN A CHANCE.

We start them in business. Sell 24 packages of Ford Metal Polish and earn money, not premiums. Outfit free. Ford Supply Co., Dept. 20, Vallejo, Cal.

To Stop Cough in Church.

Every woman has experienced the mortification of one of those exasperating, hacking little coughs which tickle the throat and seem to grow worse the more one tries to overcome them.

They always come upon one just at a time when the kindly cough drop has been left at home and it is impossible to procure the saving slip of water.

Many a woman has hastily left her seat in a church with a red face and the echo of a hacking little cough following her down the aisle and into the vestibule, when the trouble might have been conquered in a very simple way.

A cough drop is not at all essential to the stopping of a tickling cough.

A bit of paper, torn from the corner of a hymn book leaf or an available pamphlet or leaflet, will answer quite as well as the bit of hoarhound or licorice, for the action of the throat muscles in masticating the bit of paper and the consequent flow of saliva soon eases the cough, and by the time the paper is reduced to a pulp the cough will have eased, and one's nervousness will be entirely gone.

Do You Know Him?

The musician had delighted her audience for an hour with classic melody, and at some one's suggestion she was now rendering one of her own compositions.

At the close she wheeled suddenly about on the stool 'midst plaudits and general expressions of admiration. Her own little "piece" had struck closer home than the classics.

"Ah," said the listener who had heard the selection for the first time, "that is very beautiful—charming—melodious—it sounds just like something I've heard before."

How Honors Were Earned.

Extracts from old records showing how people had earned the honor in former days, were read at Canterbury, England, and ex-mayors were granted the freedom of the city. One citizen received the freedom for "undertaking to serve as cook at every mayor's Michaelmas feast," another "because he cured Nicholas Johnson's leg," and a third "because he married a widow with a large family."

WOMAN'S ILLS

Many women suffer needlessly from girlhood to womanhood and from motherhood to old age—with backache, dizziness or headache. She becomes broken-down, sleepless, nervous, irritable and feels tired from morning to night. When pains and aches rack the womanly system at frequent intervals, ask your neighbor about

Dr. Pierce's Favorite Prescription

This Prescription has, for over 40 years, been curing delicate, weak, pain-racked women, by the hundreds of thousands and this too in the privacy of their homes without their having to submit to indelicate questionings and offensively repugnant examinations.

Sick women are invited to consult in confidence by letter free. Address World's Dispensary Medical Ass'n, R. V. Pierce, M. D., Pres't, Buffalo, N. Y. DR. PIERCE'S GREAT FAMILY DOCTOR BOOK, The People's Common Sense Medical Adviser, newly revised up-to-date edition—1000 pages, answers in Plain English hosts of delicate questions which every woman, single or married, ought to know about. Sent free to any address on receipt of 31 one-cent stamps to cover cost of wrapping and mailing only, in French cloth binding.

The Dressmaker's Revange.
"Ha, ha, I am undone!" gasped the wicked dressmaker as she negotiated the final button and sank exhausted on the chair.—Puck.

For over fifty years Rheumatism, Neuralgia, and other painful ailments have been cured by Hamlin's Wizard Oil. It is a good honest remedy and you will not regret having a bottle ready for use.

Red meats are less liable to contamination than fish or chicken.

population of Europe averages slightly including the entire continent, the less than 107 persons per square mile.

Cultivate a good opinion of others, and they will have the same of you.

Notices of Entertainments where a charge is made, Cards of Thanks, etc., 5c per line.

Extract from Palo Alto Citizen on the Country Editor

"It is not surprising that men who have intelligence enough to edit and publish newspapers should want to get out of the business, for of all thankless, unappreciated work in the world, editing and publishing a country newspaper is the very worst. Country towns, as a rule, do not deserve to have newspapers. They look upon their editor as an object of pity and consider that whatever patronage is given him is so much done for charity. Yet, once let a town lose its newspaper and before twenty-four hours you will see the 'business men' of that town out with a subscription paper raising money to 'start' another newspaper. We are reminded of an instance of that kind of recent occurrence: In the little town of San Juan in San Benito county, a clever young man started a paper some years ago and gave the place more good advertising than it had ever had in all the years of its existence, yet his efforts were not appreciated and he finally was compelled to go elsewhere to make a living. Several others tried the game there after he quit, but always with the same results. Finally the town was left without a newspaper of any kind, and now the 'leading citizens' are moving heaven and earth in an effort to get somebody to 'start' another newspaper in the place. We imagine that it will be a long time before they succeed in luring anybody there who has brains enough to edit a newspaper.

"The great trouble seems to be that the people of the little country town expect their newspaper to be as big and full of reading matter as the San Francisco Examiner or the New York World, and anything short of that is, in their opinion, a failure. Go into any country town that you can think of and ask the first half dozen men you meet what kind of a newspaper they have in that town, and five of the half dozen will say that the paper is 'no good!'

"It costs just as much to print and publish a poor, little, starving newspaper as to print and publish one that is full of good paying business, and it takes real money to print and publish any sort of newspaper. The newspaper man can not buy paper, ink, type, or labor unless he has the money to pay for it, and the only way he can get the money is from the advertising and subscription patronage of his paper."

SUMMONS

IN THE SUPERIOR COURT OF THE State of California, in and for the County of Santa Clara, George B. Tolman, plaintiff, vs. Charlotte M. Tolman, defendant.

Action brought in the Superior Court of the State of California in and for the County of Santa Clara, and the complaint filed in the office of the Clerk of said County of Santa Clara.

The People of the State of California send greeting to Charlotte M. Tolman, defendant.

You are hereby directed to appear and answer the complaint in an action, entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Santa Clara, within ten days after service on you of this summons, if served within this county, or within thirty days if served elsewhere.

And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint as arising upon contract, or will apply to the court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the State of California, in and for the County of Santa Clara, this 31st day of December, 1910.

(Seal)
HENRY A. PRISTER, Clerk.
By J. M. Shilue, Deputy Clerk.

His Tokens of Farewell.

Among the legends that have gathered around Sir Alfred Jones' name is one to the effect that he was in the habit of signifying to an office visitor, by offering him a banana, that he desired to end the interview. If the banana was accepted and the call prolonged Sir Alfred arose and presented his visitor with a fine flower from one of the glass stands in his office. But, supposing his visitor stayed after the flower—well, the legend continues, Sir Alfred then offered a pass to the West Indies on one of his small steamers, with a free holiday for six weeks at his hotel.

It is told, however, that on one occasion Sir Alfred got the worst of the banana trick. A young reporter called on him to learn on behalf of his newspaper something about the shipping conflict. When, after a ten seconds' conversation regarding the weather, Sir Alfred's hand was straying toward the banana plate, the reporter hooked a couple of bananas out of his own pocket. In the sweetest tone of innocence he said, "Will you have a banana, Sir Alfred?"—Westminster Gazette.

Powerful Rifle Bullet.

A new Austrian rifle bullet, designed to pierce the shields of field guns, has a sharp pointed hard steel core which is incased in a lead coating contained in a pointed steel outer covering. A special explosive, giving greatly increased muzzle velocity, is used with this bullet. In tests by the Austrian authorities the core penetrated steel gun shields 500 yards away, the lead and steel coverings being left behind when the projectile strikes.

New Metal Lighter Than Aluminium.

A great chemical factory at Höchst-on-the-Main, Germany, exhibited a new metal at the Frankfurt aeronautical exposition that is said to be as strong as the best aluminium alloys and but half as heavy. It is called elektron and has a specific weight of 1.8 as compared to 2.9 of the best aluminium. Bolts and bars that would ordinarily be thought of as heavy were placed on exhibition and when handled seemed as light as paper mache.

Cannon and Hailstorms.

The French commissioners of meteorology have declared their disbelief in the efficacy of cannon discharges to dispel threatened hailstorms.

CYLINDRICAL CASKS.

Novel Method of Coopering Barrels of Uniform Diameter.

It is customary to build casks with tapering sides, so that the hoops which bind the staves together may be jammed tightly in place. This makes it necessary to shape the staves, which entails considerable waste of material and much trouble in assembling and bending them into position. Another disadvantage is that the tapering or bulging cask requires more room for storage than if made truly cylindrical. A novel method of overcoming these difficulties has recently been suggested. The accompanying engraving illustrates this method.

Between the staves and the hoops rings are placed, which are tapered as indicated in the sectional view, Fig. 2. When the rings are driven down they act as wedges to jam the

A NEW FORM OF CASE.

hoops tightly, so as to bind the staves in place. In order that the ring may contract in diameter as it is wedged into place it is made of wire or a strip of metal that is crinkled or bent into a zigzag form. This lightens the construction and provides a better grip on the hoops and staves. In many trades small kegs and casks of moderate size for liquids are required, but their high price and the cost of machinery for making them is prohibitive for many purposes.

The casks here described are especially suited to meet the requirements of such trades, because after the staves and heads are prepared they can be finished inside and out (including cutting the grooves) in an ordinary lathe, producing an inexpensive cask of attractive and finished appearance. The inventor of this novel construction is William Houlker of Nelson, New Zealand.

Sewer Gas Not Germ Laden.

Recent experiments by Major Horrocks of the English army would serve to confirm the suspicion that sewer emanations may be the cause of mysterious outbreaks of disease. The experiments of Winslow, however, show small positive results. Of forty-four liters of sewer air examined forty-three did not contain any bacteria. The results of Winslow's experiments support Horrocks in so far as they show that bacteria may be ejected from liquids in sewers into the air above, but at the same time they show that the general air of house drainage systems is singularly free from bacterial life. The sum and substance of the matter seems to be that bacteria may pass from sewage into sewer air, but only in such small numbers as scarcely to affect its general composition. There is, however, little reason to believe that sewer air needs to be feared as a means of conveying infectious disease.—Journal of American Medical Association.

Cure For the Hookworm.

Dr. Charles W. Stiles, in whose hands the million dollar Rockefeller fund has been placed for studying the hookworm and its cure, says sanitation is the best preventive of the disease. He attributes the prevalence of the disease in the south to the admixture of the white and black races. "Wherever two animals of nearly the same species are found," says Dr. Stiles, "there is bound to be trouble. White diseases, when they are transmitted to the black man, are grounded in virgin soil, and the black man, because of inability to withstand a disease not to be found among his ancestors, dies. This holds true in disease of the negroes which are contracted by white men."

Water Raised Fifty Feet.

At sea level atmospheric pressure is balanced by a column of pure water 33.8 feet high, and it has seemed impossible to raise water to a greater height by a suction pump. Yet Pump Operator Alzial on a French warship has accomplished the feat of drawing up water from a vessel's hold to a height of fifty feet. One end of a small bent tube was passed into the bottom of the pipe attached to the pump, the other end projecting above the water in the hold, and the working pump drew air through this tube, forming an emulsion of air and water which, having less density than water, could be raised to a greater height by pressure of the atmosphere.

Floating Drydock For Brazil.

The Brazilian government has placed an order with an English shipbuilding firm for a floating dock to be used in connection with the two big Dreadnoughts now being built for her in that country. The dock is to be one of the largest if not the largest of its kind in the world and will have a lifting capacity of 22,000 tons. It is to be constructed in eleven months at a cost of \$913,500.

Hot Water Freezes Quickly.

The water in hot water supply pipes will freeze quicker than water that has not been heated. This is because the air, which is a poor conductor of heat, has been driven out by the heat.
